**Accessible and Accredited Continuing Education Courses
Apex Innovations Announces ANCC Accreditation Award**

(Lafayette, La.) — Apex Innovations is a healthcare education organization providing superior learning experiences via web-based interactive programs. Their unique methods offer nurses a new and effective form of continued education. Recently, the American Nurses Credentialing Center (ANCC), Commission on Accreditation awarded a Certificate of Accreditation to Apex Innovations as a Provider of Continuing Nursing Education. The ANCC is the most prestigious continuing education credentialing program in the country.

The ANCC provides quality resources and accredits organizations specializing in continuing nursing education by approving and providing continuing education activities, promoting commitment, and demonstrating and ensuring the quality and high standard of the programs.

“We are excited to achieve this level of excellence and receive this formal accreditation,” said Marianne Bourgeois, Apex Innovations President. “This is just one more example of our organizational commitment to providing the highest quality continuing education possible for healthcare professionals.”

With accreditation from ANCC, Apex Innovations will continue offering high quality educational services with engaging interactive visual activities through a variety of programs. Interactive learning programs offered by Apex Innovations include: imPULSE™ ECG Competency Series Chest Pain Education, Hemispheres™ Stroke Competency Series, Responder™ STEMI Recognition, and MI Rule Visions™ – the innovative, proven, 3D myocardial infarction and ischemia reference tool.

Brian White, Sr. Vice-President of Apex Innovations will speak at ANCC’s Continuing Education Symposium in Chicago on July 7, 2011. The symposium is a premier learning and networking opportunity, with sessions on a variety of topics, including: Managing Interdisciplinary Education, Effects of IOM Reports on Continuing Education Practice, and Using Technology to Full Capacity. White’s session will focus on “using technology to drive education,” highlighting the educational effectiveness of new educational technologies as well as the benefits these tools provide to medical organizations and professionals.

-MORE-

Apex Innovations, an international leader in interactive and engaging medical educational products and tools, was founded in 2003 by Marianne Bourgeois, BSN, RN, with the goal of developing quality educational resources for medical professionals. With corporate offices in Lafayette, Louisiana (USA), Apex Innovations designs, manufactures and provides unique tools, software, competencies, resources and accredited educational web-based programs for individuals, universities, organizations and corporations around the world.
