

Dear CoAEMSP Paramedic Program Manager,

As an organizational member of the CoAEMSP Board of Directors, the National Association of Emergency Medical Technicians (NAEMT) understands and appreciates the rigorous review that your paramedic program successfully completed to obtain your CoAEMSP accreditation.

NAEMT is **very interested** in having your accredited paramedic program offer our continuing education programs (including PHTLS, AMLS, GEMS, EPC, EMS Safety, etc.). In recognition of the high educational standards your program has demonstrated through your CoAEMSP accreditation, NAEMT will waive our traditional requirement of affiliate faculty monitoring of new courses.

CoAEMSP accredited paramedic programs can now use their designated course coordinators to monitor their own faculty teaching NAEMT courses, provided that their faculty complies with all NAEMT instructor requirements (i.e., successful completion of the NAEMT instructor course and provider course).

With this more streamlined process, we hope that you will consider offering NAEMT courses. Please contact Corine Curd, NAEMT's Course Site Development Manager at corine.curd@naemt.org if you are interested and for additional information.

Sincerely,

Pamela Lane, MA
Executive Director, NAEMT
