

INTRODUCING THE X SERIES® ADVANCED: ADVANCE YOUR CARE FOR EVERY RESCUE

Manage your patients more effectively than ever with ZOLL's new X Series Advanced monitor/defibrillator. X Series Advanced offers groundbreaking new features:

Real BVM Help® provides real-time clinical feedback on manual ventilation, including delivered tidal volume and rate, a ventilation quality indicator, and a countdown timer.

TBI Dashboard™ enables care providers to effectively manage patients with traumatic brain injury. The dashboard combines trending of critical vital signs with real-time ventilation feedback in one comprehensive view.

Remote view capabilities allows clinicians to remotely view real-time data from the X Series Advanced monitor/defibrillator screen via a cellular or WiFi connection.
