

This EMT Says 'Commitment, Service & Sacrifice' with His Boots. How Do You Say It?

Why do you see uneven wear on an EMT's boots?
Because every time an EMT drops a knee to help
someone, it scrapes the same toe. Performing CPR?
Both knees down, both toes scrape. So though an
EMT wears them, thousands of people wear them down.

Introducing the NEMSMF Commitment, Service & Sacrifice challenge...

*A nationwide look at what drives
EMS to be the first line of defense.*

Show us in pictures, words or both what "Commitment,
Service & Sacrifice" mean to you as an EMS Provider.

We're creating a gallery of the images and words that motivate
the people of the EMS to keep serving so "that others may live."
Check the NEMSMF website to watch as our gallery grows.

National memorials honor the sacrifices of law enforcement and the fire service.
None honors the ultimate sacrifices of the men and women of EMS. The **National
EMS Memorial Foundation** exists solely to establish a permanent EMS Memorial
in Washington DC. With your help, we will finally commemorate those who have
fallen in the line of duty, have been disabled and those that continue to serve.

Please consider making a tax-deductible donation.
